Olympia, WA 98501

Dear Ms. Svae,

Thank you for your recent work with the City of Olympia in providing Posture Control Inserts for use in our city-wide Wellness Program.

As the City of Olympia's Employee HealthCare Manager I have found the use of your product to be of great value in caring for those employees with chronic musculoskeletal pain. Specifically, I prescribe the Posture Control Inserts for the vast majority of employees who report to me with complaints of neck, back, hip, knee or foot pain and who display postural deviations related to hyperpronation.

For symptoms related to possible work-related issues, the Postural Control Inserts are provided free of charge to the employee. To date, your inserts have been accepted extremely well by our employees and I have yet to have a pair returned for any reason. Many of our employees report noticeable improvement in their level of pain within 3 – 5 days of use.

You have been very attentive to our specific needs and our orders are always received in a timely manner. Your Posture Control Inserts are an important part of our City's approach to wellness and I plan to continue using your product as we grow our program.

Yours in Good Health,

Brad Payne, PT  
Employee HealthCare Manager
